Manufactured Modular Construction

Expandable in **3** Directions

Real affordability can only be obtained with a new modular building technology using new composites. A few unique components and a smart way of putting them together.

Our manufactured modular construction is a breakthrough in the building industry. Our design offers the flexibility to create multi-floor layouts in increments of 4.2ft (1.3m). Our small house will sell for \$14,750 and assembles in about 2 hours, no skill required. Our technology will contribute in solving the worldwide affordable housing crisis.

The FRP structural elements connect to each other like a LEGO set. Our material is as strong as steel, but four times lighter and resists fire, water, mold, corrosion and chemicals. The composite wall panels, window panels and door panels slide in to the structural frame. The entire building is locked together by special shock absorbing connectors. Need a larger house, just add more components. Our buildings are strong and will survive a substantial hurricane.

Building Kit with 2 Rooms - Open Space	FOB USA	Price	\$14,750
Footprint:	4.1m x 8.1m (13.4ft x 26.5ft)		
Living Space:	30.2m ² (325ft ²)		
Structural Elements: FRP (Fiber Reinforced Polymer)			
Wall Panels: Aluminum Composite - Foam Sandwich with an Aluminum Frame			
Insulation Value	R-35		
Building Kit with All listed Options	FOB USA	Price	\$22,750
Bathroom Module:	Shower, Sink, Toilet , Vent		
Walk In Closet Module			
Modular Kitchen Cabinets	Quick Wall Connect System		
Kitchen Sink with Faucet	Stainless		
Refrigerator/Freezer	164L/45L		
Ceramic Top Stove	3 Burners		
Hot Water Heater	50L		
Mini Split AC	18,000 BTU		
Glass Top Dining Table with 4 Chairs and Sofa			
Flat Screen TV with Wall Mount	42 inch		
Queen Size Bed with Desk and Chair			
Security System			

A Small House with a Kitchen big enough to serve gourmet meals!

We use the same seal technology from the automobile industry to seal our buildings. You can drive a car at high speed through rain and you don't get wet!

The roof profiles have an integrated gutter, strong enough to walk on it!
